Key Experience

Odoo Development & Customization2022-2025 (3+ years)

Development from scratch and customization of original Odoo modules. Full-cycle project implementation from requirements gathering and technical specification development to module implementation, training, and support.

Business Process Design & Enterprise Management2006-2021 (15 years)

Business process design and enterprise management including spare parts import, service center network, e-commerce, and marketplace operations.

Key Advantage

My background combines previous business management experience, specialized technical education, and acquired current programming skills in Python and Odoo framework. This allows me to provide end-to-end solutions for clients - from task definition and collaborative technical specification development to module implementation, training, and ongoing support.

Portfolio

Complex Projects

Container Fleet Management Module▶ Demo Video

- Container certificate creation
- Automatic container pool creation from certificates
- Container purchase/sale operations
- Container movement tracking across warehouses/routes/tenants
- Supporting international ISO, IMO classifiers

Container Rental Management Module▶ Demo Video

- Container rental contract creation
- Container issue/return operations by contracts
- Tariff rate grid (gate in/out, per day, one-way charge, etc.) and price lists (special conditions)
- Rental payment calculation by contract

Customizations

Web Form for Agricultural Company Data Collection▶ Demo Video

Data collection form for crop oil content with CRM module integration and automatic data population in agricultural profile in res.partner.

Custom Kanban View for Activities from res.partner▶ Demo Video

Custom kanban view for mail.activity with required elements, ability to add voice comments when completing activities with transcription to text. Display of completed and planned activities in a single report (pivot view) with comment viewing capability.

Project Module Customization▶ Demo Video

Linking project to discuss.channel chat, automatic sending of service messages to chat (task assigned/accepted/completed/checked with or without comments). Templating of special project stages (delegated/under review, etc.). Dashboard for tasks by own/assigned to someone/assigned to me.

New "Order Correction" Operation in Sale Module▶ Demo Video

Order-related operation "Order Correction" (works similarly to similar operation in 1C, developed for compatibility of order data export from 1C to Odoo). Allows changing quantity, price and other parameters from order line items in sale.order. Multiple corrections can be linked to one order.

Nova Poshta Directory Integration via API▶ Demo Video

Separate module with directories of regions, settlements and Nova Poshta branches, updated via cron. Added ability in res.partner to create deliveries of different types from data sets (recipient, phone, city, Nova Poshta branch or full address for courier delivery by company transport).

Skills

Primary Skills	Secondary Skills
Python7/10	DevOps4/10
Odoo Server Framework8/10	Business Analysis8/10
Odoo Web Framework5/10	EnglishB1-B2
JavaScript4/10	

Soft Skills

Management -Human. -Time. -Task.	Information Structuring Ability to extract key points from information flow and break down into clear stages	Adaptability Understanding of environmental variability → multivalent approaches to solutions
